

Be A Helpful Neighbor by Eliminating Stagnant Water Sources

Did You Know:

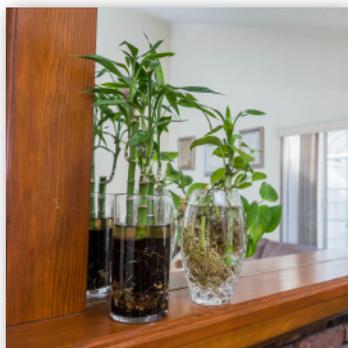

Mosquitoes in this area can spread **West Nile virus** with one bite.

Mosquitoes can fly out of everyday containers that hold stagnant water.

TIP out the water and **TOSS** out the source, or report large sources to management.

Small Containers

Indoor Plants

Water Fountains

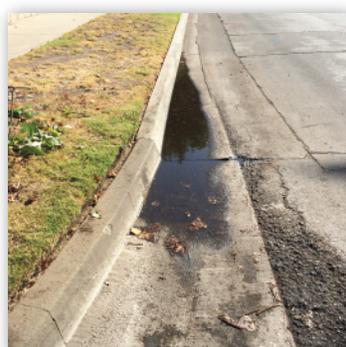

Buckets

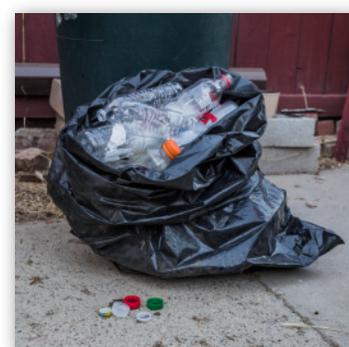

Pet Bowls

Plant Saucers

Street Gutters

Recyclables

No Water = No Mosquitoes

Protecting the Public from
Vector-Borne Diseases since 1989
